This report is useful for the day traders. It filters/finds the scrips for buying and selling for intra day trading with the stop loss shown in Dly CP (Daily Center Point) Column.

One should remain cautious in trading in case of scrips showing more than 3 days and the strategy is HL & OB, as these are likely to find rough road at higher levels.

The filtration through this report is on the basis of Daily Center Point and levels mentioned in Indicators box of main page. This is being intraday calls targets on either side's trade should be considered from Pivot levels only.

This is also available on daily, weekly and monthly basis where weekly and monthly reports are useful for positional and delivery based traders.

This report also provides the levels of Strategy of trading for the scrips filtered alongwith the Weekly and Monthly Center Point, through which trader's can interpret the potential of scrips as positional buying.
