This report is useful for the positional(delivery based) traders. It filters/finds the scrips for buying and selling for positional trading with the stop losses shown in respective trend levels. These report is filtering for all the trend, i.e. immediate, short, medium and long term. Out of all short and medium term filtering is more advisable. As far as long term filtering is concerned 100 Days is more effective than 200 Days.

After filtering one can should also take the help of trading strategy, Weekly Center Point and Monthly Center Point for further filtration among the lot being filtered.

This report helps brokers & sub-brokers to provide the services to their clients in terms of delivery base calls.
